About me

I began my academic path in Physics, driven by curiosity and a strong interest in understanding how things work. In parallel, I taught myself programming through online courses, which quickly became a passion. Eventually, I decided to fully shift my focus toward software development.

I later completed the Programming Technical Degree at UTN, where I built a solid foundation in modern development practices. My experience includes developing RESTful APIs with Spring Boot, building frontend applications with Angular, applying design and architectural patterns, using agile methodologies, and collaborating effectively within cross-functional teams. I enjoy tackling complex problems and transforming them into clean, scalable, and maintainable solutions.

Studies

- Software Technician – Universidad Tecnológica Nacional
2024 - 2025
- Physics Teaching Degree – Universidad Nacional de Mar del plata
2018 – 2024

Skills

- Java
- Springboot
- JPA/Hibernate
- Angular
- MySQL
- Postman
- Jira/Trello
- Github
- English (B2)

Experience

- **CAECE:** NOV 2024 – PRESENT
I work in technical support, focusing on maintenance and troubleshooting of issues related to software, hardware, and network systems.
- **UNMdP:** MAR 2020 – DIC 2023
Assistant Teacher in Physics I and Physics II.
